

# CRAZY 4 POKER

## HOW TO PLAY

Players receive five cards to make their best four-card Poker hand. A four-hand Straight is a Straight, a four-card Flush is a Flush, etc.

## PLAYER VS. DEALER

This game involves three different bets: "Ante," "Super Bonus" and "Queens Up." The "Ante" and "Super Bonus" bets are mandatory and must be equal, while the "Queens Up" bet is optional. The Play wager must match the Ante unless the player has a Pair of Aces or better. A Pair of Aces or better is needed to bet up to 3x the Ante. The dealer qualifies with King-high or better.

When a player beats the dealer's qualifying hand, the player's Ante and Play bets win even money. When the dealer qualifies and beats the player's hand, his/her Ante and Play bets loss. When the dealer does not qualify the player's Play bet wins and his/her Ante bet pushes. "Super Bonus" and "Queens Up" wagers are resolved separately.

## SUPER BONUS

The Super Bonus wins when a player has a Straight or better. Failure to get at least a Straight, however, does not result in an automatic loss. The Super Bonus pushes when the player has less than a Straight, but the player beats or ties the dealer's hand. If the player's hand of a Straight or better loses to the dealer, he/she still receives the Super Bonus payout. In addition, the original Super Bonus bet is not removed.

## QUEENS UP

The Queens Up optional bonus bet wins when the player receives a Pair of Queens or better. See layout for odds. Note: Winning Super Bonus and Queens Up wagers are paid regardless of the dealer's hand.
